Author Index Volume 29

(The issue number is given in front of the page numbers)

Albrecher, H., J.L. Teugels and **R.F. Tichy,** On a gamma series expansion for the time-dependent probability of collective ruin (3) 345–355
Armstrong, M.J., The reset decision for segregated fund maturity guarantees (2) 257–269

Berg, M., see Perry, D. (1) 23–34
Blake, D., A.J.G. Cairns and **K. Dowd,** Pensionmetrics: stochastic pension plan design and value-at-risk during the accumulation phase (2) 187–215
Brekelmans, R. and **A. De Waegenaere,** Approximating the finite-time ruin probability under interest force (2) 217–229

Cairns, A.J.G. see Blake, D. (2) 187–215

De Waegenaere, A., see Brekelmans, R. (2) 217–229
Denuit, M., Laplace transform ordering of actuarial quantities (1) 83–102
Dickson, D.C.M. and **C. Hipp,** On the time to ruin for Erlang (2) risk processes (3) 333–344
Dowd, K., see Blake, D. (2) 187–215

Forsyth, P.A., see Windcliff, H. (1) 1–22
Frostig, E., A comparison between homogeneous and heterogeneous portfolios (1) 59–71
Frostig, E., Comparison of portfolios which depend on multivariate Bernoulli random variables with fixed marginals (3) 319–332

Guo, J.Y., see Yuen, K.C. (1) 47–57

Hipp, C., see Dickson, D.C.M. (3) 333–344

Ignatov, Z.G., V.K. Kaishev and **R.S. Krachunov,** An improved finite-time ruin probability formula and its *Mathematica* implementation (3) 375–386

Jasiulewicz, H., Probability of ruin with variable premium rate in a Markovian environment (2) 291–296
Josa-Fombellida, R., and **J.P. Rincón-Zapatero,** Minimization of risks in pension funding by means of contributions and portfolio selection (1) 35–45

Kaishev, V.K., see Ignatov, Z.G. (3) 375–386
Krachunov, R.S., see Ignatov, Z.G. (3) 375–386

Landsman, Z. and **M. Sherris,** Risk measures and insurance premium principles (1) 103–115

Marceau, É. and **J. Rioux,** On robustness in risk theory (2) 167–185
Milevsky, M.A. and **S.D. Promislow,** Mortality derivatives and the option to annuitise (3) 299–318

Olivieri, A., Uncertainty in mortality projections: an actuarial perspective (2) 231–245

Perry, D. and **W. Stadje,** Function space integration for annuities (1) 73–82
Perry, D., M. Berg and **M.J.M. Posner,** Stochastic models for broker inventory in dealership markets with a cash managements interpretation (1) 23–34
Posner, M.J.M., see Perry, D. (1) 23–34
Powers, M.R. and **M. Shubik,** Toward a theory of reinsurance and retrocession (2) 271–290
Promislow, S.D., see Milevsky, M.A. (3) 299–318

Rincón-Zapatero, J.P., see Josa-Fombellida, R. (1) 35–45
Rioux, J., see Marceau, É. (2) 167–185

Sherris, M., see Landsman, Z. (1) 103–115

Elsevier Science B.V.
PII: S0167-6687(01)00098-1

Shubik, M., see Powers, M.R. (2) 271–290
Stadje, W., see Perry, D. (1) 73–82

Teugels, J.L., see Albrecher, H. (3) 345–355
Tichy, R.F., see Albrecher, H. (3) 345–355

Valdez, E.A., Bivariate analysis of survivorship and persistency (3) 357–373
Vetzal, K.R., see Windcliff, H. (1) 1–21

Windcliff, H., P.A. Forsyth and **K.R. Vetzal,** Valuation of segregated funds: shout options with maturity extensions (1) 1–21
Yang, H. and **L. Zhang,** On the distribution of surplus immediately after ruin under interest force (2) 247–255
Yuen, K.C. and **J.Y. Guo,** Ruin probabilities for time-correlated claims in the compound binomial model (1) 47–57

Zhang, L., see Yang, H. (2) 247–255
